NEAPCO DESIGNS AND MANUFACTURES QUALITY PRODUCTS THAT ARE BEST SUITED FOR YOUR APPLICATIONS

N eapco's products for the Lawn & Garden market focus on powered equipment and small tractors with less than 40 HP. The lawn and garden components generally utilize the Neapco N1000 and 1200 series u-joints. Neapco offers a greaseable u-joint in both series and a permanently lubricated u-joint in the N1000 series. Some common residential and commercial applications include:

- Small Garden and Utility Tractor drives for:
 - Lawn Care Implements
 - Snow Blowers
 - Rotary Tillers
 - Rotary Brushes
- Deck and Implement Drives for Zero Turn Radius (ZTR) Commercial Mowers
- Engine Drives
- Front Accessory PTO Drives
- Power Transmission Drives (4WD Tractors)

Neapco offers many styles of yokes to interface with different output shaft configurations.

Standard products include clamp, quick disconnect, round bore, spline and flanged yokes.

Neapco can provide fixed length drives or incorporate telescoping capability using spline or rectangular shafting. CV Joints can be utilized in certain applications. Where driveshaft speeds are 1000 rpm or less, Neapco can provide non-rotating driveshaft shielding designed to fulfill your safety requirements.
