

Product Announcement

Expanded C.V. Head Assembly Coverage

Neapco announces expanded coverage of the popular N1330 and N1350 C.V. Head Assemblies. These assemblies are increasing in population on popular G.M., Ford, and Dodge 4x4 and SUV applications.

The N1330 Series is a replacement for the popular Saginaw S44 (3R) style C.V. head (4137268) widely used in G.M. applications. This assembly features increased angularity over the OEM unit. Overall length is slightly shorter than the OE assembly.

The N1350 Series assemblies are used in popular Ford and Dodge OE vehicles, and for Jeep Rubicon conversions. Converts Jeep Rubicon single u-joint OE rear driveshaft to double cardan C.V. head. Bolts directly to factory vibration damper at transfer case.

Style	H Overall Length	Maximum Angle	C Female Pilot Diameter	F Butt Diameter	E Bolt Hole Spacing	Tube Size Reference	D Bolt Hole Size	Assembly Part Number
N1330 Series	use Kit No. 2-4801		A-3.875	B-1.062	(Replaces Spicer® No. 5-1203X)
