NEAPCO DESIGNS AND MANUFACTURES QUALITY PRODUCTS THAT ARE BEST SUITED FOR YOUR APPLICATIONS

Neapco's products for the Small Vehicle market focus on small commercial and recreational applications. The Small Vehicle components generally utilize the Neapco N1000 and 1200 series u-joints. Neapco offers a greaseable u-joint in both series and a permanently lubricated u-joint in the N1000 series. Some common applications include prop shafts and CV shafts for:

- All-Terrain Vehicles
- Utility Vehicles
- Golf Carts
- Go-Carts

Neapco offers many styles of yokes to interface with different output shaft configurations.

Some standard products include spline, pin, slip, clamp, round bore and flanged yokes.

Neapco can provide fixed length drives or incorporate telescoping capability using spline shafting or CV joint assemblies. Types of Constant Velocity joints offered include Rzeppa, Tripod, Double Offset and Double Cardan.

INNOVATIVE DRIVELINE SOLUTIONS
